Sub: Refresher Course on "Soil & Water Conservation and Watershed Management" - reg.

Dear Sir/Madam,

ICAR-Indian Institute of Soil and Water Conservation, Dehradun is organizing Refresher Course on "Soil & Water Conservation and Watershed Management" from February 11-14th, 2020. Objectives of the course is to equip the senior and middle level officers working in managerial capacities in different states, with latest technologies and policy issues in the area of soil & water conservation and watershed management so that programmes could be implemented in a realistic and effective manner to create an impact in the real field situations. It is requested to kindly depute 2-3 officers from your department for this course.

A copy of the brochure and nomination form is enclosed herewith. Duly filed in form may kindly be sent to the Head (HRD&SS), ICAR-IISWC, Dehradun by 10th January, 2020.

Thanking you

Yours faithfully,

[P.R. Ojasvi]

Background

Management of natural resources is one of the most critical challenges faced by the country in the present time. By 2050, India needs to increase its food grain production up to 377 Mt in order to feed a population of around 1.6 billion. However, this increase in production has to come from shrinking soil and water resources which are already under intense pressure due to various anthropogenic interferences. The water availability to agriculture sector is also going to be reduced to 65 % from the present share of 78 % in the coming future due to increase in demand from other sectors. At the same time the land resources are expected to produce 30 % lesser owing to deterioration in soil health and quality. To meet out these challenges our efforts should be channelized towards conservation of soil and water resources at every step through combination of policy decisions at National level and execution of the work at the ground level. In this context, the Soil and Water Conservation Officials working at different platforms play a pivotal role in achieving the forthcoming challenges. With this background, this Refresher Course has been designed to equip, expose and update the Officials in the field of Soil and Water Conservation to the latest knowhow in the domain area. Such type of training will not only help in enhancing the knowledge but also implementation of the Soil and Water Conservation Technologies at right place and right time would also help to align with the Government's vision of doubling farmers income through conservation of the resources.

Objective

To update the officials working in Soil and Water Conservation with latest tools and techniques on Natural Resource Management.

Methodology

The Course is consisting of a blend of classroom lectures, critical analysis of conservation programs and field visits.

Content

The program would cover topics on the following broad areas :

- ★ Effective conservation measures for arable and non-arable land
- ★ Rain water harvesting, recycling and micro-irrigation systems
- ★ Evaluation and management of existing resources
- ★ Sustainable soil management
- ★ Alternate livelihood security options for economic sustainability
- ★ Resource sustainability through people's participation

Program Duration

February 11-14, 2020 (4 days)

Last Date for receiving nominations

January 10, 2020

Program Fee

Rs. 20,000/- per participant (Inclusive of registration, boarding and lodging charges). Fee may be sent through D.D. in favour of the Director, CSWCRTI, Dehradun or through E.T. RTGS A/c holder - ICAR Unit Account C.S.W.C.R.T.I., Dehradun A/c No. 10901524109, IFSC Code SBIN0010640 (if amount transferred through E.T. please inform).

Eligibility criteria and maximum entries

Senior & middle level officials already working in the area of Soil and Water Conservation from different States are eligible for the course. Preference will be given to the officers who have already attended 5 ½ months / 4 months course at IISWC, Dehradun. Total no. of seats are 25 and it will be allotted on first come first serve basis.

Boarding and Lodging
